

Turn fragile GCP operations into reviewable, handover-ready cloud assets.

Founder-led GCP/SRE review and scoped implementation support for agencies, MSPs, and small cloud teams.

Built for

Software agencies, MSPs, cloud consultancies, and small SaaS teams that already ship on GCP but need senior reliability capability without hiring a full-time SRE.

Typical triggers

Rising cloud cost, fragile release paths, unclear Terraform ownership, missing runbooks, or handover risk before launch.

ENTRY PRODUCTS

Cloud Cost Hygiene Review

For teams watching GCP bills rise without a clear plan.

USD 1.5k–3.5k About 1 week

- Cost risk & waste assessment
- Idle-resource & over-provisioning report
- Logs & observability cost review
- Label, budget & alert recommendations
- Prioritised cost-hygiene roadmap

GCP Reliability & Architecture Review

For teams launching, scaling, or preparing for audit.

USD 3k–7.5k 1–2 weeks

- Architecture risk profile
- Environment structure assessment
- Access, release & monitoring review
- Backup & disaster recovery check
- Prioritised remediation roadmap

Launch & Handover Bootstrap

For teams facing key-person risk or preparing for client handover.

USD 2.5k–8k 1–3 weeks

- Structured runbooks & recovery steps
- Release checklist & rollback notes
- Operations overview & onboarding notes
- Handover-readiness checklist

CI/CD workflow setup can be scoped as an add-on.

Final quote depends on scope, access boundaries, implementation depth, and required evidence review.

HOW AN ENGAGEMENT WORKS

01

Scope

Define workload, access boundaries, and deliverables.

02

Review

Senior-led assessment with written findings.

03

Deliver

Reviewable, version-controlled outputs.

04

Follow-up

Optional implementation scoped separately.

Implementation support is scoped separately after review.

Why Mizumoto Tech

- Production GCP/SRE depth
- GCP, GKE, Terraform, CI/CD, observability, cost optimization
- English / Japanese / Chinese collaboration
- Written-first, async-friendly delivery

Safe to start small

- Scope before access
- Written findings before implementation
- No fake transformation promise
- No 24/7 production ownership
- Client team decides what to act on

Pick one workload, project, or cost concern.

Mizumoto Tech delivers a written assessment with prioritised findings. Any follow-up implementation is scoped separately.

Start with a scoped review
